

Queensland Aerospace Pty. Ltd.

Company Profile

Introduction

Established in 1990 Queensland Aerospace College (QAC), a subsidiary of Queensland Aerospace Pty. Ltd., is one of the world's leading schools for providing excellent standards of training in aviation maintenance and aerospace engineering.

The College specialises in advanced aircraft maintenance engineer training, both theoretical and practical, on an impressive range of aircraft types including Airbus, Beech, Boeing, Bombardier, De Havilland, EADS Casa, Embraer, Fairchild, Fokker, Saab, Viking Air and engine types including CFM, General Electric, Honeywell, Pratt and Whitney, and Rolls Royce.

QAC is also backed by approvals from the world's foremost authority's on civilian aviation safety, the Australian Civil Aviation Safety Authority (CASA) and European Aviation Safety Agency (EASA)

Code of conduct

We are a leading global aircraft maintenance engineer training organisation.

Our purpose is to create long-term value through the development of training resources, and the provision of innovative customer and market-focused training solutions.

To be prosperous and achieve real growth, we must:

Respect & trust

Earn the respect and trust of our customers, staff, suppliers and the industry generally by being honest and upfront in all our communications and delivering on our commitments consistently.

Value

Our purpose is to create long-term value through the development of training resources, and the provision of innovative customer and market-focused training solutions.

Performance

Continually grow and advance QAC towards being a high-performance organisation in which everyone accepts responsibility and is rewarded for results.

Business units

Queensland Aerospace College

Queensland Aerospace College (QAC) delivers instructor led theoretical and practical aircraft maintenance courses covering a broad range of aircraft.

<https://qac.net.au/>

QAC On-the-Job Traing (OJT)

OJT is a program for aircraft engineers that supports the practical type course requirements for achieving a rating. OJT programs can be completed on-the-job as an alternative to a traditional practical course.

Approvals

QAC is backed by approvals from the world's foremost authority's on civilian aviation safety, the Australian Civil Aviation Safety Authority (CASA) and European Aviation Safety Agency (EASA).

Australian Government Civil Aviation Authority

The Civil Aviation Safety Authority (CASA) is a government body that ensures the safety of aviation in Australia. CASA licenses pilots, registers aircraft, certifies aerodromes, oversees aviation safety and promotes safety awareness. CASA sets standards and safety outcomes that cover maintenance, airspace, aerodromes, licensing, and all types of operations.

Australian Government
Civil Aviation Safety Authority

The European Union Aviation Safety Agency (EASA)

EASA is an agency of the European Commission with responsibility for civil aviation safety in the European Union.

EASA carries out certification, regulation and standardisation and also performs investigation and monitoring. EASA collects and analyses safety data, drafts and advises on safety legislation and co-ordinates with similar organisations in other parts of the world.
